

It's your heart. It *should* be personal.

And that's how I treat it.

When you come to see me... that's exactly who you will see. I will take your health personally. That is why I am the only doctor you will see when you come to my office. I will take time with you and get to know you personally. No patient of mine will ever have to see an associate or undergo needless testing. I will know which tests are needed and which aren't. I will watch over you and treat you as I want to be treated, when one day I am the patient and not the doctor. And that is my promise to you.

- Interventional Cardiology – Stents
- Pacemaker and Defibrillators
- Vascular Medicine
- Clinical Cardiology
- Echocardiography
- Nuclear Cardiology
